It's a junior-focused issue of Scottish Chess magazine for June, arriving a little late (apologies) as I wanted to include the Edinburgh Chess Academy event in these pages.

Huge kudos are due to Andrew Douglas for the ECA junior tournament, and hopefully you'll enjoy the report and games included.

Summer may have arrived which would usually herald a spot of travel and

events to report on, but online chess is still dominating the chess calendar, at least in Scotland.

For the next issue I'd be eternally grateful if readers could send me games, reports, pics and results - the more the merrier!

## Scottish Junior Online Championships

A photograph showing five people of various ages standing outdoors, each holding a large chess piece high above their head. From left to right: a young girl in overalls holding a white king, a young boy in a dark shirt holding a white king, a young girl in a purple top holding a white king, a man in a dark jacket holding a black king, and a man in a blue shirt holding a black king. The background is a bright, overcast sky.

It was easily the most lucrative junior chess event ever held in Scotland and hundreds of kids took part in the chase for a share of £10,000 and online chess glory.

With Skyscanner providing unrivalled sponsorship, qualifying rounds across five sections saw 100 players surviving to battle out the finals.

A TwitchTV stream meant parents, friends and chess fans could also follow the action with commentary from ECA founder Andrew Douglas.

In the end, as we will see, there were plenty of winners and also lots of great games played along the way. Let's take a closer look at how the event came about, followed by the thrills and spills of competitive junior chess!

**Andrew Douglas has been a junior chess coach for many years now, founding the Edinburgh Chess Academy along the way.**

When he announced earlier this year that a huge online tournament was to be held for children in Scotland, it raised eyebrows, but that was mostly due to the incredible sponsorship he'd found for the event.

Edinburgh-based travel search giants, Skyscanner, were putting up £10,000, making the Edinburgh Chess Academy Scottish Junior Tournament (ECASJT) perhaps the nation's best-funded junior event of all time.

"I have just launched an online Scottish junior chess tournament through Edinburgh Chess Academy. The goal is to get more children playing chess. Please help spread the word," was the clarion call from Andrew, and it didn't fall on deaf ears.

When the plaudits for the remarkable event came in afterwards, Andrew took a typically self-effacing tone. "All I would say was

that it really was a joint effort. All the junior organisers across Scotland came together to tell children about it and couldn't have been done without them."

It also couldn't have been done without Skyscanner, the company's co-founder Gareth Williams describing chess as "a combination of skills that are useful in life: analysis; biding your time; making risky decisions and such-like."

Gareth also pointed out another very positive aspect of using chess to engage children: "Above all, while technology is going towards micromoments of stimulation, where you need a reward every 5 seconds (to raise) the dopamine levels, playing a proper game of chess is a feat of concentration that kids, less and less, are required to show."

Andrew also explained some of the thinking behind the event, with "the aim of getting more children to play chess in Scotland."

To that end the entry was free, with unrivalled prizes on offer and across all playing levels.

Andrew explained: “There are lots of good players out there who don’t necessarily play serious tournaments.”

For those unused to competitive online play, the ECASJT event ran practice sessions in the run-up to the qualifiers, which in turn led on to the Championship events.

LiChess was the online chess platform of choice and a total of 455 players vied for 100 qualifying

spots across the weekend of June 12 and 13th.

Everyone who participated received a certificate in recognition of their efforts and as a reminder of the event, while those who made it through the first stage had the Championships proper to look forward to a fortnight later.

With an Open section and four grading sections of u1800, u1500, u1200 and u900, and £10,000 to be shared across the five tournaments, the action was non-stop.

Let’s start by taking a look at how the Open section played out...

"FREDERICKtheMATE" Gordon, Jake "jake\_sanger26" Sanger, Daniel "Hyper\_Dragon" Kitaev

3.5/6 £150=

For those who know some of the players in the list above, the hot favourites were almost certainly Freddie "FREDERICKtheMATE" Gordon and Jake "jake\_sanger26" Sanger. Both have tasted the top level of junior chess and have experience of playing big events.

However, there was an upset on the cards early on as Anish "Anishananth" Subramaniam defeated Jake in the opening round and followed it up with this see-saw victory in the second round against top seed Freddie!

The surprising 17...♜h5! would

have set White difficult problems.  
 Black wouldn't usually offer this

A remarkable finale to the Open section, meaning that both players finished on 4/5, winning £1200 each and Anish edging the tiebreak!

Four players, Ben, Freddie, Jake and Daniel “Hyper\_Dragon” Kitaev, tied for 3rd spot and won £150 each.

The other four sections were all hard-fought affairs as well.

The **u1800 Championship** section saw a tie between **Sophie “SavoryPawn” Heron** and **Bob “bobissocool” Davis**.

They pocketed £1000 each for their excellent runs, drawing with each other in round 4, while 3rd spot went to Pranav “pranav378” Arcot on tiebreak, though the £500 was shared with Angelo “angelolynn123” Lynn.

In the **u1500 Championship** there was a clean sweep for **Louis “louischeng 0528” Cheng**.

His 5/5 score won him £1000, a clear point ahead of his nearest rivals, Patrik “Patrik\_Tomcisak” Tomcisak and Nikunj “BlueAthleticKnight” Nagar who took £500 apiece for their excellent play.

The **u1200 Championship** was a triumph for George Watson’s pupil **“adavis15”**, a last round draw from a position of strength securing the title and £750.

The enigmatic “FirestarW” and Campbell “CampbellMackay” Mackay took £350 each.

That brings us to the **u900 Championship** and there was a clear winner in this section also, with **“Ishaanh”** scooping the £500 top prize, ahead of “ZakariyahCheng” and “ZoobaWin”.

In the world of online chess there is still a need for arbiters and “fair-play watchdogs”, with CS Vice-President Andy Howie taking on both roles.

If you want to check out all the games and results, you can do so via the link below on lichess...

<https://lichess.org/swiss/RFYQIAJA>

...and with that, the incredible event was done and dusted, hundreds of content children who had enjoyed a month full of chess fun and games mixed with serious competition.

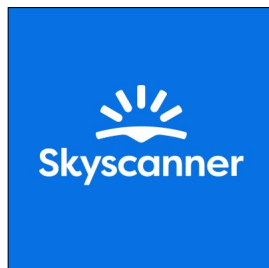

Andrew took to the Edinburgh Chess Academy Facebook page to announce: “The Scottish Junior Chess Tournament is officially over! A huge thank you to everyone who helped organise the event or took part, and congratulations to our 2021 winners.”

He added a well-earned plug for the ECA: “If you want to improve your chess skills, sign up to Edinburgh Chess Academy for online courses.”

Of course, it wasn’t entirely a “one-person show”, with a number of helpers behind the scenes as Andrew indicated.

...and your Scottish Chess magazine download includes both pgn and .cbv files that allow you to play through all the tournament’s games as well as others from this issue.

Andrew Douglas deserves huge credit for organising such a huge and successful event, and Skyscanner’s Gareth Williams also deserves praise for putting his money where his heart lies to raise the profile of the junior game in Scotland. Many thanks!

# Chess Book Corner

with Ian Marks

This month our resident chess critic and bibliophile, Cumbernauld's very own Ian Marks, looks at a newly-released book that finds its inspiration in the 19th Century...

## THE LASKER METHOD TO IMPROVE IN CHESS

by Gerard Welling and Steve Giddins, New in Chess, 240 pp., publ. 2021

The idea behind this book can be summed up in one phrase: to make the average player's life a lot simpler. The authors' inspiration comes from Lasker's classic *Common Sense in Chess* (the 'method'), based on a series of lectures the great man gave away back in 1895 (and, as a classic work, essential reading).

In it, the World Champion outlined an approach to the game for

ordinary players based on playing sensibly and adhering to general principles, in the words of the authors *"...an efficient and independent approach to chess, with nothing superfluous, which is diametrically opposed to what many players do in practice, by storing as much information in their brains as they can"*. Chess is perhaps too concrete a game to allow for such an approach exclusively, but the underlying philosophy of keeping things simple is certainly nothing new. As the American philosopher Thoreau put it: *"Simplify, simplify, simplify! \* I say, let your affairs be as two or three, and not a hundred or a thousand; instead of a million count half a dozen, and keep your accounts on your thumb-nail."*

(\*You could argue he could have simplified that by using only one 'simplify'.)

It's easy for ordinary players to become overwhelmed by the sheer volume and range of books, DVDs, courses, downloads, soft-

ware, online resources etc. etc. available nowadays. The authors seek to redress this information tsunami by indicating how players can try to declutter their chess minds and reappraise their approach to the game. Maybe not quite back to basics, but along those lines.

They do so via chapters on general chess philosophy and common sense, strategy and positional play, the endgame, attack, defence, Ns v Bs, amorphous positions, the opening, then games for study and tactics. Their watchwords are 'simple' and 'sound', an echo of Portisch's *"I can recommend the following: simplicity and economy"*. Good advice is timeless.

In each chapter they illustrate how each aspect of the game can, certainly to an extent, be handled in a no-frills manner. Ask me for my favourite and I think I'd plump for chapter seven which deals with amorphous positions, basically keeping your position flexi-

ble, not committing yourself, and waiting to see what your opponent's up to, which, as the authors point out, can be an excellent way to play for a win.

The authors provide seventy-three games and fragments, many

of them by Lasker himself, but featuring an impressive collection of other big (and not so big) names, from Alekhine and Capablanca up to Kasparov and Carlsen. In keeping with the nature of the text, words (sensibly!) take precedence over moves:

*“Our approach has been to annotate games largely with verbal explanations, adding concrete detail only when this is essential to understand what is going on”.*

Chapter eight, *An approach to the openings* (sic), is a useful overview of how openings-obsessed

ordinary players could trim back their workload. You don't necessarily have to agree with the authors' every word or suggestion, but it should at least set you thinking. Curiously, though, the openings index omits references

**Dutch IM Gerard Welling has now written two books with co-author Steve Giddins**

to those which appear in this chapter! The index would have you believe there's nothing on, say, the Evans Gambit or Vienna, yet they're covered on pp. 98-9 and 103-5 respectively. In similar

vein, the King's Gambit reference is to a game on p.65, not the coverage on pp. 105-7. Talking of the Evans, the authors 'get it out of the way' with the unusual 4... d5!?, rather strangely, since Lasker's no-nonsense suggestion of declining it with 4...Bb6 transposes directly into their line in the Giuoco Pianissimo on p.101, where they even cite a game by... Lasker! Anomaly aside, this is a good illustration of the 'common sense' philosophy at work: spending ages mugging up on the sharp stuff after 4...Bxb4 v. just playing 4...Bb6 and getting on with your G/75 league game in peace.

The authors have done a good job of setting Lasker's common sense approach in a contemporary context and bringing it to a new readership. I suspect it will find greater resonance amongst players who learnt their chess with books and a board, rather than the computer generation. The beauty of books like this is that they require you to *think* about chess and

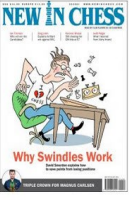

FM Steve Giddins: a prolific chess author who has covered everything from opening theory to biographies.

hopefully understand the game better. Those whose chess consists of robo-clicking through reams of trainable variations will find much food for thought and no small amount of wisdom between its covers. The target readership – 'average amateurs' – is probably around 1500-2200. At the lower end a certain amount of knowledge is assumed (as the authors write in the endgame chapter, "...we will assume the reader has mastered these 'essential positions' for himself"), at the higher end, stronger players will most likely be savvy to this sort of stuff already.

The authors write smoothly and with a lightness of touch which reads easily without ever drifting off-message, and the book is presented in crystal-clear double column format. The psychedelic cover featuring a funkily beshaded Lasker appealed to me, but I'm a

fan of quirky stuff like this. I can imagine it might have others reaching for the paracetamol. Overall, a thoroughly enjoyable, highly readable and highly recommended piece of work.

**A** Scottish book connection that many likely don't know exists, writes your editor, involves chess publishing house **Elk and Ruby**, and we are very grateful to founder **Ilan Rubin** for the following extract from one of their latest books.

**The Livonian Knight: Selected Games of Alvis Vitolins**, by **Zigurds Lanka, Edvins Kengis, Janis Klovans and Janis Vitomskis** covers the career of Alvis Vitolins (1946-1997) who was a seven-time chess champion of Latvia, a player with a ferocious attacking style, and one of the game's last true openings innovators in the pre-computer age.

Vitolins was a world-class blitz player and was a regular blitz sparring-partner of his friend, world champion Mikhail Tal. Vitolins often deployed gambits, and his attack-minded novelties in the Ruy Lopez, Sicilian, Nimzo-Indian and Bogo-Indian set trends that were copied at top-level chess, including in world championship and candidates matches. He gained the International Master title in 1980.

Through an analysis of 25 of his most exciting games, this book, first published in Latvia in 2008, tells the reader of Alvis's chess legacy, which includes many breathtaking Talesque sacrifices. Additional full games and fragments from Vitolins's career are incorporated in the annotations. Opponents include the authors of this book as well

as grandmasters Alexei Shirov, Vladimir Bagirov, Vladimir Tukmakov and other stars of Soviet and post-Soviet chess.

The book contains a new foreword specially written for the English edition by Genna Sosonko, who met Vitolins on several occasions.

It seems that Vitolins was totally sure that the black pawns didn't "want" to move ahead, and that he hence first needed to apply some pressure, and then destroy the pawns with the help of his bishops!
